Here's why it's the combination
varmint hunters asked for

A MODERN REMINGTON STREAMLINED RIFLE CHAMBERED FOR A MODERN REMINGTON VARMINT CARTRIDGE . . .

THE CARTRIDGE . . . 222 REMINGTON

The new 222 Remington Hi-Speed cartridge was ballistically designed to take full advantage of the modern features of the Model 722 rifle. Together, they make a perfect varmint hunting combination at a moderate price.

Proof of accuracy. An actual size group shot at 100 yds. with the Model 722 and the new cartridge. Bench rest.

The 50 grain soft point bullet is encased in a tapered metal jacket thin at the nose for perfect mushrooming and reduced ricochet. The jacket is thick at the base to prevent bullet separation. Bullets shown approximately twice size.

THE RIFLE . . . REMINGTON MODEL 722

Receiver bridge and ring drilled and tapped for adaptable scope mounts and micrometer receiver sights. Low up-turn of bolt handle and side-placed safety allows low telescope mounting. High comb stock is especially designed for scope shooting.

Excellent match rifle trigger. A sharp, crisp, lightning-fast let-off that pays off on long shots. No back-lash. Experts everywhere have praised this trigger. New bolt stop prevents bolt from striking sear or trigger.

Clean, trim lines. Minimum of dirt-catching openings, few projections. Solid, double locking lugs of the polished bolt glide smoothly for faster action in rapid firing. Convenient thumb safety blocks the firing pin and locks the bolt.

Strongest action ever developed. Cartridge cases completely supported and enclosed by the encased bolt head and the barrel. An exclusive feature for maximum safety and accuracy. Extractor contained entirely within the bolt head — no extractor cuts in barrel.

SPECIFICATIONS

Remington
DU PONT

MODEL 722A "STANDARD" GRADE — chambered for 222 Remington cartridge. 26-inch round, tapered barrel of special steel. Carefully bored and rifled for extreme accuracy. High comb stock of genuine American walnut especially designed for use with telescope or receiver sight. Properly shaped pistol grip. Long, full, well rounded fore-end of semi-beavertail type. Shotgun style metal butt plate, checkered to prevent slipping. Rifle cocks on opening movement of bolt. Sensational trigger without back lash — lightning fast let-off. Side placed thumb operated safety. Polished bolt and action. Special bolt stop. Magazine holds 5 cartridges which with one in chamber gives a capacity of 6 shots. White metal bead front sight mounted on matted ramp. Step adjustable sporting rear sight. Receiver drilled and tapped for adaptable scope mounts and standard micrometer receiver sights. Weight about 7 1/4 lbs. Length over all 45 1/4."

FANCY GRADES: Available in B "Special" Grade (selected walnut stock with checkering and sling-swivels) or with these features plus engraving and finest walnut stock in D "Peerless" and F "Premier" Grades. ("A" Grade illustrated)
