

A HOLLOW POINT AND 15% MORE LEAD
MAKE OUR SLUG A SLUGGER.

SLUGGER

The Remington "Slugger" is the first rifled slug with one high-performance improvement you can see. Its unique hollow point, with more lead behind it, greatly improves your customers' downrange expectations.

Our new 12-gauge Remington "Slugger" rifled slug has a full ounce of lead. On impact, it mushrooms over 20% more than 7/8-oz. loads. Energy is also increased, at the muzzle and out to 100 yards. Tests show the new Remington "Slugger" gives better retained downrange velocity with predictable accuracy, shot after shot.

Give your rifled slug customers another reason to choose Remington first. Stock the Remington "Slugger."

Remington is a trademark registered in the U.S. Patent & Trademark Office and Slugger is a trademark of Remington Arms Company, Inc., Bridgeport, Conn. 06602.
