## REMINGTON INTRODUCES TWO NEW HANDGUN AMMUNITION LOADINGS

In 1987 the Remington Arms Company will add two new handgun loadings to its pistol and revolver ammunition line. These new offerings include:

### 357 MAGNUM 140-GRAIN SEMI-JACKETED HOLLOW POINT

The inclusion of Remington's a new 140-grain semi-jacketed hollow point bullet in loadings for the 357 Magnum adds several useful performance features to this cartridge. Remington believes that 140 grains is the optimum bullet weight for the 357 Magnum. It provides greater energy than 125-grain loads and flatter trajectory with less recoil than 158-grain loads.

Equally significant are the performance characteristics of Remington's semi-jacketed hollow point bullet design. The combination of an exposed lead bullet core with hollow point, inside the scalloped jacket, has been scientifically designed for maximum yet controlled expansion at handgun cartridge velocities. The result is optimum expansion performance for both handgun hunting and law enforcement applications.

### 45 COLT 225-GRAIN LEAD SEMI-WADCUTTER

This new Remington loading for the 45 Colt provides improved ballistic performance and greater versatility for this permanently popular old cartridge. Featuring a "Keith-style" semi-wadcutter

lead bullet weighing 225 grains, it produces a significant increase in both velocity and energy at all ranges over the traditional 250-grain lead loading.

Comparatively, the muzzle velocity, at 960 feet per second, of the new loading represents an increase of 100 fps, and the muzzle energy of 460 ft-lbs is 10 percent greater. The semi-wadcutter design has proven to be ideal for both target shooting and other handgun options.

BALLISTICS

<u>Range</u> <u>(Yards)</u>	<u>Velocity</u> <u>(ft/sec)</u>	<u>Energy</u> <u>(ft-lbs)</u>	<u>Mid-Range</u> <u>Trajectory</u>
--------------------------------	------------------------------------	----------------------------------	---------------------------------------

357 MAGNUM 140-GRAIN JACKETED HOLLOW POINT\*

0	1360	575	-
50	1195	444	.7"
100	1076	360	3.0"

\*From 4-inch vent barrel.

45 COLT 225-GRAIN SEMI-WADCUTTER\*

0	960	460	-
50	890	395	1.3"
100	832	346	5.5"

\*From 5 1/2" test barrel.
