"SMOKELESS" SHELLS LOADED WITH NITRO POWDERS

—BY—

THE UNION METALLIC CARTRIDGE COMPANY.

SCHULTZE, E. C., S. S., and AM. WOOD.

"Smokeless" and "Trap" Shells have the celebrated U. M. C. No. 3 Primer, and are especially designed for Nitro Powders ("New Club" and other lower grade shells being only suitable for Black Powder). These Shells are loaded in the best possible manner by the U. M. C. Company, and give most excellent results with Nitro Powders. U. M. C. Trap Wads, grease-proof and elastic, are used next to the powder, thereby greatly improving the uniformity of combustion and force of the powder charge, and giving increased velocity, pattern, and penetration.

U. M. C. "Smokeless" Shells will be loaded only as below stated. Heavier charges will be loaded to order in "Trap" Shells. ORDER BY NUMBER AND STATE KIND OF POWDER AND SIZE OF SHOT.

Packed 25 in a box; 500 in a case.

TO THE TRADE.

The good reputation of our Loaded Shells will be maintained by strict adherence to our fixed principles of loading, best and most suitable grain of powder, correct size wads, square crimp, etc. No variations can be made that, in our opinion, will detract from the quality. Special labels or special numbers cannot be used.
