

# International Ammunition Association

## Journal Index

From *Cartridge Trader* #1 through *International Ammunition Journal* # 512 Plus ICCA *Annuals* and the IAA *Guide to Ammunition Collecting* (2<sup>nd</sup> & 3<sup>rd</sup> Editions)

### About This Index

This "subject-matter" index is in two parts.  
The first is an alphabetical list of cartridge articles and information.  
The second, is a list by author of the major articles published over the years.

The issue references are in the form issue # / page # (e.g.: 401/38) except where the ICCA "Annuals" and the Guide to Ammunition Collecting are concerned.

The references to the annuals is by Volume, Number and page. E.g.: Vol 2 No 3/18.

The reference to the Guide to Ammunition Collecting is Guide 2nd Ed./page #.

For ease of use, we have tried to be consistent with caliber names. For example: 9mm Luger and 9mm Parabellum have been abbreviated to 9mm Pb.. 7.62 NATO is 7.62 x 51; .223 is 5.56 x 45 Etc.. Metric designations have been coded with a space either side of the "x".

Accents have been omitted for ease of electronic searching (apologies to our non-US members).

The elements in this index have been sorted into ascending sequence with numbers before letters.  
This index is available on the IAA website - it will be updated as new IAA *Journals* are published.
