Remington

AMMUNITION

components

NOTICE

We have color coded this price list in RED print to identify those Remington component items subject to the retail recordkeeping requirements of the Gun Control Act of 1968, as amended.

Records of retail sales need be kept only for the items appearing in RED.

This identification of the items subject to recordkeeping has been approved by the Alcohol, Tobacco and Firearms Division of the Internal Revenue Service.
**CENTER FIRE LEAD BULLETS**

**“POWER-LOKT” BULLETS**

* Packed 50 per box, all others 100 per box.
* Orders Subject to Stock on Hand

## PRIMERS

Remington primers are made with famous “Kleanbore” non-mercuric, non-corrosive, priming mixture. They feature instant and positive ignition, will not cause rust or corrosion. Your gun barrel will be kept cleaner.

**FOR PISTOL AND REVOLVER**

Pistol and revolver cases in the Remington line include 29 calibers, a selection unmatched from any other source.

**PRIMED CASES ARE NOT MAILABLE**
Remington's wide selection of bullets means more game, better scores!

“POWER LOKT”
The hollow in the point in combination with the nose cuts in the jacket of the varmint hunting bullet controls the expansion. Maximum, game-getting shocking power is delivered at all ranges.

“CORE-LOKT” SOFT POINT
A good choice for medium and big game... especially when you're hunting in heavy brush. Exclusive Remington “Core-Lokt” design assures deep penetration and controlled expansion—up to double normal caliber.

“CORE-LOKT” POINTED SOFT POINT
A fine bullet for bringing down game at long range, the Remington Pointed Soft Point “Core-Lokt” has flatter trajectory, maximum remaining velocity, maximum striking energy.

“CORE-LOKT” HOLLOW POINT
Here's a real game getter! It assures deep penetration and controlled expansion. Similar in use to Remington Soft Point “Core-Lokt,” but designed for less rapid mushrooming.

BRONZE POINT
An excellent all around type of bullet with a unique design, the Remington Bronze Point has good wind-bucking qualities. It travels with a flat trajectory, and has high remaining velocity and fine accuracy at long range.
